

Dual Executive Governance & RBAC Protocol (v3.0)

Super Admin & CAO Hierarchy • Configurable Thresholds • AI Operations Diagnostics

1. Executive Overview & Security Philosophy

HandyHub Pro Solutions enforces a Dual-Executive Governance & Least-Privilege Role-Based Access Control (RBAC) architecture. Administrative authority is partitioned across strategic policy (Super Admin) and operational coordination (Executive Operations / CAO), supported by specialized departmental managers with cryptographic audit logging.

2. Enterprise Staff Roles & Functional Hierarchy

Chief Commander (Super Admin)	[ROLE: SUPER_ADMIN]
Supreme platform sovereignty. Sets policy, manages staff promotions, approves high-risk financial decisions (> !100k escrow, > !50k refunds), and controls database backups.	
Executive Operations / CAO (Second-in-Command)	[ROLE: EXECUTIVE_OPERATIONS_MANAGER]
Cross-departmental command. Coordinates field bookings, marketplace merchants, parts procurement, and verification. Escalates items exceeding autonomous thresholds to Super Admin.	
Operations Manager (Field Dispatch)	[ROLE: OPERATIONS_MANAGER]
Command of field bookings, live technician radar, district radius tuning, and active artisan job matching.	
Marketplace & Logistics Manager	[ROLE: MARKETPLACE_MANAGER]
Commercial store onboarding, physical storefront GPS checks, catalog SKU moderation, and multi-zone delivery fees.	
Verification & Compliance Officer	[ROLE: VERIFICATION_OFFICER]
Audits 5-pillar artisan dossiers (NIN, facial biometrics, trade cert, address proof, guarantors) and customer proof of address.	
Finance & Escrow Controller	[ROLE: FINANCE]
Audits Paystack transaction logs, reviews artisan bank withdrawal requests, manages promo budgets, and audits escrow balances.	
Customer Support Specialist	[ROLE: CUSTOMER_SUPPORT]
Customer ticket mediation, live booking progress tracking, review moderation, and dispute triage.	

3. Granular Module Permissions & Governance Matrix

Module / System Capability	Super Admin	CAO (Ops)	Operations	Marketplace	Verification	Finance	Support
KPI Command Center & AI Analyst	Full	Full	Ops	Mkt	—	Fin	—
Executive Approval Queue	Supreme	Auton. Limit	—	—	—	—	—
Bookings Workflow & Live Map	Full	Full	Full	—	—	Audit	Track
Marketplace & Partner Stores	Full	Full	View	Full	—	Audit	View
Spare Parts & Supplier Vouchers	Full	Full	Approve	Stores	—	Disburse	—
Staff Roles & Hierarchy Promotion	Authorized	—	—	—	—	—	—
Artisan 5-Pillar Compliance	Full	Full	View	—	Full	—	View
Customer Address Proof Audits	Full	Full	—	—	Full	—	—
Disputes & Customer Refunds	Full	"d ₹50k	Mediate	Mkt Disp	—	Refund Auth	Triage
Escrow Vault & Bank Withdrawals	Full	"d ₹100k	—	—	—	Full	—
Commission Policy & System Config	Authorized	—	—	—	—	—	—
Database Backups & System Purge	Authorized	—	—	—	—	—	—

4. Autonomous Thresholds & Escalation Protocol

Escrow Payout Releases	"d ₹100,000 Autonomous (CAO)	> ₹100,000 Mandatory Super Admin
Customer Dispute Refunds	"d ₹50,000 Autonomous (CAO)	> ₹50,000 Mandatory Super Admin
Procurement Part Quotes	"d ₹75,000 Autonomous (CAO)	> ₹75,000 Mandatory Super Admin
Staff Role Reassignments	Strictly Super Admin Only	All promotions & hiring

5. AI Executive Operations Analyst Engine

The autonomous AI Analyst inspects real-time PostgreSQL database telemetry across booking assignment velocity, price quote variance, dispute backlog, and merchant fulfillment SLAs to produce a dynamic Platform Health Index (0-100) with actionable 1-click executive remediations.
